

Dr Nadine Marshall

Senior Social Scientist, CSIRO Ecosystem Sciences
CSIRO

Phone: (07) 4753 8537

Mobile: 0439 073 010

Email: nadine.marshall@csiro.au

Dr Marshall has been involved with the fishing industry in Queensland since 1999. She works as a social scientist with CSIRO and also works with other primary industries. Her main research looks currently looks at how fishers, farmers and graziers might be vulnerable to climate change, and how they might best prepare. She is currently an advisor on the steering committee for FRDC's Social Sciences Research Coordination Program.

Dr Renae Tobin

Research Fellow
Fishing and Fisheries Research Centre
James Cook University

Phone: (07) 4781 5196

Email: renae.tobin@jcu.edu.au

Dr Tobin has worked with Queensland fishers and fisheries and marine park managers through social science research since 2002. Working within the Fishing and Fisheries Research Centre at James Cook University, her research has been stakeholder driven and therefore diverse, ranging from exploring conflict between sectors, documenting effects of management change on industry, developing socio-economic indicators, investigating potential for co-management in regional areas, to now exploring the adaptive capacity of industry to change.
